SFG-2F-SB 2-finger soft gripper narrow jaws

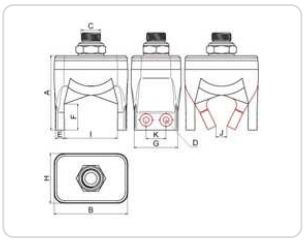

The AGS soft gripper is an innovative and remarkable device in the field of robotics and automation. The AGS soft gripper is equipped with advanced soft material technology, which gives it unique flexibility and adaptability. Unlike conventional rigid grippers, the AGS soft gripper adapts to the shape of different objects. This makes it ideal for handling objects with irregular shapes, such as delicate handicrafts, soft fabrics or sensitive electronic components, without damaging them during gripping. Various sizes available on request.
