GRIPPER CONSTRUCTION STARTER SETS

GSS-P-SCHUNK EOAT - Start Set Prism SCHUNK

Product Description – GRIPPER (EOAT) Construction Starter Kit / Schunk Components The AGS GRIPPER (EOAT) construction starter kit offers the ideal introduction to modular gripper construction. It contains a well-thought-out selection of basic components from the AGS gripper modular system and enables the rapid construction of customized gripping solutions – flexible, stable, and efficient. A special highlight: The kit is compatible with Schunk parallel grippers and offers special adapter solutions for easy integration. This allows Schunk grippers to be seamlessly integrated into the AGS GRIPPER (End of Arm Tooling) modular system – for reliable handling solutions and maximum process reliability. Highlights: - Basic kit for modular GRIPPER construction. Ideal for combination with Schunk parallel grippers. - Fast assembly thanks to precisely fitting components. - Lightweight design for dynamic applications. - Modular expandability for individual requirements.
